***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach a method of producing different olfactive characteristics when a fragrance composition is applied on the skin of different individuals such as that instantly claimed. The closest prior teaches compositions where heat is applied during the mixing of the essential components. The instant claims and the specification (see page 12, Preparation) stress the importance of the mixing the essential components without the application of heat.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
